## **DETAILED ACTION**

## **Election/Restrictions**

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-6, 11-17, and 21, drawn to an optical switching system and methods of operating this system (e.g., as shown in Figs. 3-5 and 7-11), classified in class 398, subclass 12.
  - II. Claims 7-10 and 18-20, drawn to a reflected light measuring system and methods of operating this system (e.g., as shown in Figs. 6 and 12), classified in class 398, subclass 12.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombination and combination, respectively. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because this situation can be diagramed as combination ABbr ("br" is an abbreviation for "broad"), and subcombination Bsp ("sp" is an abbreviation for "specific"). Bbr indicates that, in the combination (i.e., the entire "reflected light measuring system" in claim 7), the subcombination (i.e., the "optical switching system" limitation in claim 7) is broadly recited and that the specific characteristics (e.g., the "optical reflection monitors" in claim 1) required by the subcombination claim Bsp are not required by the combination claim.

Since claims to both the subcombination (optical switching system) and combination (reflected light measuring system) are presented, the omission of details of the claimed subcombination Bsp in the combination claim ABbr is evidence that the combination does not rely upon the specific limitations of the subcombination for its patentability. If subcombination Bsp has separate utility, the inventions are distinct and restriction is proper if reasons exist for insisting upon the restriction. In this case, the subcombination has separate utility, such as an operating optical switch 100 in an operating

Art Unit: 2633

communication network as shown in Fig. 1, not as a disconnected device undergoing testing as shown in Fig. 6.

- 3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. That is, search for Group I would focus on an optical switching system with its own internal mechanisms for determining locations of light reflections within itself. The search for Group II would focus on a reflected light measuring system that provides an external mechanism for determining locations of light reflections within a separate optical switching system.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David S. Kim whose telephone number is 571-272-3033. The examiner can normally be reached on Mon.-Fri. 9 AM to 5 PM (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Chan can be reached on 571-272-3022. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/058,781
